1. United States Production Right to Carry Over for use in 2019 is the Unused Federal Reserved Water Right available to 9 public water suppliers in 2019 as per the Judgment.

2. Pursuant to Section 5.1.8 of the Judgment, Antelope Valley Joint Union High School District has an additional 29 AF of Production for use on its athletic fields and other public spaces. When recycled water becomes available to Quartz Hill High School at a price equal to or less than the lowest cost of any of the following: Replacement Obligation, Replacement Water, or other water that is delivered to AVJUHS at Quartz Hill High School, AVJUHS will stop producing the 29 AF groundwater and use recycled water.

3. Phelan Pinon Hills CSD Replacement Obligation is equal to its total groundwater production as per Judgment Section 6.4.1.2.

4. 2019 one-time transfers not associated with a transfer of Production Rights: A 400 AF one-time transfer to Antelope Valley County Club and a 1,391 AF one-time transfer to Long Valley Road. A portion of these transfers will be applied to 2018 Replacement Water Obligations and the remainders are available for use in 2019: AVCC=400-112.35=287.65 AF available. LV Road=1,391-322.69=1,068.31 AF available. Unused amounts will become Carry Over water.

5. The 3.0 acre-foot Production Right for the Small Pumper Class reflects the maximum annual Production by Small Pumper Class members without incurring a Replacement Water Assessment.

Table does not include rights to Stored Water.
